

MARITIME COMMUNICATION SOLUTION

PLUG 'N' PLAY SMALL SCALE SYSTEMS

DATA SHEET

IHM PLUG 'N' PLAY COMMUNICATION SYSTEMS

IHM's PLUG 'N' PLAY communication solutions consist of four stand-alone systems:

- IHM MICRO
- IHM SAILOR
- IHM OFFSHORE ONSHORE and
- IHM FLEXIBLE

The standard solutions comprise basic and optional communication functionalities, 1 to 4 operator positions and up to 6 radios.

The IHM PLUG 'N' PLAY solutions meet most requirements for communication and are compliant to rules and regulations within the relevant industries.

Choosing the right system

When deciding which PLUG 'N' PLAY solution that meet your needs and requirements this data sheet gives an overview of the functionalities provided by each solution.

Number of radios and operators position are the first selective criteria. Hereafter, the needed functionalities would narrow down which solution to choose.

Select functionalities that fits your needs

IHM MICRO and IHM SAILOR are relevant for minor marinas, locks and bridges with a need for up to 4 base stations or radios, and just one operator position. For IHM SAILOR, only Sailor radios are usable, which also implies an optional DSC feature.

IHM OFFSHORE ONSHORE is especially designed for the offshore industry, where remote control of communication on one or several oil rigs would ensure huge financials benefits. The number of radios interfaces are from 1-6 depending on number of functionalities needed. The solution allows one operator position.

IHM FLEXIBLE entails the highest numbers of radios and operator positions. In addition, the solution also provides most options for integration into a wide range of radio technologies.

Easy to install and easy to use

Despite the high complexity of technology, installation of the PLUG 'N' PLAY solutions is simple. The embedded start-up program reduces installation time to only entering the types of radios. Hereafter, the system is up and running.

Please feel free to contact our agents or IHM for further information on the PLUG 'N' PLAY solutions.
